What we do

“We design, manufacture, and install the UK’s most sustainable cycle parking products”

Mission

The “R” in Doing R Bit is the key driver in our business as we look to Reduce, Re-Use, Recycle and Rebalance the impact on the environment throughout all our processes.

Using our “Three paths towards a sustainable future” we deliver against our commitment to “Do R Bit” and make a difference for future generations. The three paths:

- Sustainable service delivery
- Sustainability in the supply chain
- Sustainable project implementation

Meet Dave

Doing R Bit Founder

Dave Spencer

Founder

Dave Spencer founded one of the largest cycle parking companies in the UK in the early Nineties, selling up in 2017.

Having been encouraged out of retirement after a climate lesson from his then 10 year old grandson he brings a career's worth of experience and knowledge, together with an ambition to fulfil his promise to breathe a greener life into both public and private cycle parking infrastructures!

With over 30 years in the cycle parking industry Dave brings experience, guidance, problem resolution and ideas to whatever projects he's involved with!

Our products

A brief overview

At Doing R Bit, we are focused on providing high-quality products, built using principles pivotal to maintaining sustainable approaches in construction.

All our products are manufactured using FSC/PEFC certified sustainably harvested timber – a renewable resource that ensures we help maintain the natural balance of our forests.

We provide:

Cycle Shelters

Secure Lockable Cycle Compounds

Lockable cycle shelters with sliding gates

Cycle lockers (individual, or multiples of)

Our products

A brief overview

Scooter Planters

Cycle planters

Scooter Racks

School Streets Planters

Sustainability

Using materials where it matters – the Doing R Bit approach places sustainability at the heart of everything we do.

All our shelters come complete with living green roofs that encourage biodiversity, pollinators and remove air pollutants aligning perfectly with Clean Air initiative campaigns.

We limit the use of carbon-intensive materials such as steel and concrete in our construction without compromising integrity.

We have a unique “soft impact” installation method that requires no concrete base or mains services search and is completed in just one visit keeping disruption and downtime to the bare minimum.

Our Timber

All our timber is FSC/PEFC certified.

What does that mean? It means that our timber products come from forests meeting high standards or criteria that ensure sound practices in sustainable forestry.

For more information about our timber visit: www.doingrbit.co.uk/timber
